### ➤ Introduction

Asian concrete society plays a key role in achieving global sustainable development as the consumption of concrete drastically increases. Our great challenge is how to simultaneously satisfy the increased construction demand and decreased environmental impact due to resource and energy consumption.

The International Conference of Asian Concrete Federation is a premier leading conference, under the auspices of the Asian Concrete Federation (ACF). The ACF 2018 aims to share and build on practical sustainable and innovative concrete materials and structures development. It is a platform for concrete professional community to share advanced concrete technologies, innovations, case studies and research development as well as the importance of the production and use of concrete in a more sustainable and innovative way with scientists, researchers, government officials, specification makers, project owners, constructors and others. The conference organizing committee warmly welcomes all of you to Fuzhou to join our event.
